/64 cont./ high mountain ridges -- hekurá --, who represent the intermediaries to Poré and Perimbó, the joint Supreme Being of these Indians (see pp.197/199). The particular animal or plant whose name a child bears is regarded as a sort of "spiritus familiaris" throughout its life. This is linked to the idea that the fate of the child has now become identical in essence with them; that is to say, good fortune, but also the suffering and dying of animals and plants are transferred to the like-named human beings.

The use of animal names corresponds to the nagualistic ideas and customs which Eduard Seler mentions in his monograph /65/ on Michuacan /Michoacán/ (326), while plant names are

326. Seler, 1908, pp. 104/05.

also included under the same aspect by the Surára and Pakidái. The name "nagual," according to Seler, is derived from the Aztec word naualli = disguise (327). In place of nagualism, however, the

327. Seler, 1904, pp. 75/76.

technical term "tonalism" may also be used (Aztec tonalli = someone's destiny, fate, soul, spirit...) (328).

328. Haekel, 1958, p. 45.

On the day of the name-giving the children are given a tonsure such as is worn by all adults of both sexes. It is shaved off with the sharpened side of a split piece of reed (taquara -- Guadua sp.). Simultaneously they are attired for the first time in the hip cord of cotton or plant fibers, which they may then never remove up to the end of their lives, not even while bathing or during sleep. The cord must, of course, be renewed occasionally, but this is done in all secrecy. At the time of the donning of the hip cord by little boys, the penis is tied up, with the preputium held fast under the cord by means of a loop (Ill. 22). From now on the penis must no longer hang down, for this would be an offense against good form. On festive occasions a belt of cotton is also tied around children (see pp. 64ff.).

226 They also fish, but fishing takes second place and is much less important than hunting.

222 241 Other important sources of food are wild fruits and vegetables, which they frequently obtain. Many local groups devote themselves to agriculture, which they carry on in rudimentary fashion and which they adopt from their Caribe neighbors, but for many groups the products of the earth constitute at present a primary food base.

224 The men prefer to go out hunting at dawn or in the afternoon before the sun sets. During the morning they spy on the game as it comes to drink water or to look for food in the places [223] known by the hunter. In the afternoon the Sanemá hunts birds when they return to the trees to spend the night hidden among the leaves.

The men commonly go out alone, sometimes with a com- [789] panion, or in small parties. They walk with great care, without [826] making any noise, and they believe that in a moment of great danger they can develop such power in their necks that it lifts them above the ground and they fly to the height of the trees.

224 /205/ The hunters prepare themselves in various ways for ● 777 their work. If one of them has had bad luck, he tries to rid 826 himself of the "dark blood," the cause of his poor aim. He [237] achieves this by piercing, by means of a ray-fish sting, the muscles of the arm or by making small incisions on the forearm. [841] "Dark blood" is produced in the body of a man when a woman during menstruation touches the hunter or one of his weapons, or also when a woman in this condition has eaten any of the game hunted by him.

224 A good hunter does not eat any of his own catch in order not 262 to lose good luck or to miss when he shoots. He eats the game [777] of his companion; of the animals caught by him he only asks for the skull and the ribs, which he carefully keeps in certain places near the rancheria or in his house. They are exhibited [554] there in order to augment his prestige as a skillful hunter, on which depend many aspects of his social life, such as, for example, obtaining a second wife.

/205 cont./

224 411 It is also dangerous to lose an arrow when one is hunting. That is why they only shoot the arrow when, should they miss the target, they can easily retrieve it. In spite of these precautions, the arrow is sometimes lost or remains hanging from an [782] inaccessible tree. Then the man, in order not to lose his aim, puts it under the protection of Omao, to whom he speaks, saying: "Omáuawan ipa ʃlaka toldíapala!" which means: "Omao, watch over my arrow!"

224 •777 789 826 To lose one's aim or luck in hunting may arise from a technical reason or a supernatural cause. The former is due to a weakening of the body brought about by sickness or other causes which influence sight or the strength of the arm. If it is due to this latter cause, the hunter knows the remedy. He goes to the forest and searches for a tree with hard, heavy wood; he cuts a piece and sets fire to it and collects the ashes, which he applies to the cuts inflicted on his arm. If he bears the pain without touching the hurt arm with the other hand and does not shout, his muscles will once again recover their lost strength and the hunter will recover his luck and good aim.

224 776 777 If the hunter returns without any game, it may be because Omao did not favor him, and this is the supernatural cause of his failure.

224 782 [799] According to our informants from the Erebato, a good hunter speaks frequently with Omao, for without his protection he will not be lucky. For this reason he says to him: "Omao awayí ipa ʃálawa hadu kapálama!" which is translated as: "Omao, draw my game out into the open!"

Worse than being unlucky is to lose one's life in a hunting accident, and in order to implore the protection of the other world, the hunter prays, "Omao sátoria palái!" that is to say: "Omao, protect me!"

224 825 /206/ Of course, all these precautions are useless if the hunter has not learned the art of hunting. He must know how the various animals live and how to identify their tracks. If these latter should be fresh, he orders his dog to follow the track of the game; the success of a Sanemá hunter depends in great

neutral. The treacherous feast for their Shamatari enemies proved to be unsuccessful: The intended victims had accepted the invitation, but were informed of the plot just before they arrived. One of the Reyaboböwei-teri who had close kinsmen among them had misgivings about the matter and warned them.

Late in the afternoon it was learned that the Mahekodo-teri were, in fact, in the vicinity of the village, allegedly on a "camping trip." Kąobawä, of course, suspected their story, but to demonstrate his friendship he invited them to be his guests at a feast. As he and his men had been away for nearly two weeks, there was an abundance of food in their gardens and they could easily afford to entertain the Mahekodo-teri and their traveling companions, the Boreta-teri. Together, the guests numbered about 100—after they fetched their women and children.

This sets the stage for the feast in the kind of context that makes it more intelligible: The specific historical relationships between the participants and the nature of their mutual mistrust. Now I will give the details of the events that followed.

The Feast

Perhaps because he suspected the Mahekodo-teri and Boreta-teri of intimidation, Kąobawä also invited the Karohi-teri to attend the feast. They are a small but dependable ally and had themselves separated from the Mahekodo-teri many years ago. This established a balance of power at the projected feast should any trouble arise, for the combination of both Boreta-teri and Mahekodo-teri was of sufficient strength to worry any host. With the aid of the Karohi-teri, Kąobawä's group was more of a match for the visitors.

The feast started out on a sour note. It is the custom of the Yąnomamö visitors to arrive only after an invitation from their hosts, sent by messenger on the day of the feast. The Mahekodo-teri and Boreta-teri, however, arrogantly arrived nearly a week before Kąobawä's group was prepared to receive them and set up a large, temporary camp a short distance from the village. They were guests and could legitimately demand to be fed. Because of this, Kąobawä and his covillagers were under obligation to feed them, some hundred or so people, and took them to the gardens to supply them with enough plantains to last a week. Kąobawä was a little disturbed that they would be so impolite as to arrive uninvited, but took the situation quite philosophically. After all, they had fed his group for the better part of a year.

He and several other men cut a large quantity of plantains, which were hung in his house and allowed to ripen for a week, to be boiled into *date*, a thick, sweet soup, on the day of the feast. That afternoon Kąobawä and a few of the older men commissioned a hunting party comprised of young men, several of whom were Kąobawä's brothers, whose responsibility would be to obtain a large quantity of fresh meat to give to the visitors on the day after the feast. Most of them were reluctant to go, as their feet were still sore from the trip to the Shamatari village. A few of them claimed to be sick and managed to escape recruitment into the hunting party in this way. This hunt, with the hanging of the plantains in the headman's house, initiated the feast. The excitement that usually attends a feast began at this time.

That evening the young men danced and sang in the village, an institution called *amoamo*, thereby insuring themselves with luck on the hunt. (The Yąnomamö also
